

Statistics Release

CARE HOMES, SCOTLAND SEPTEMBER 2005

Introduction

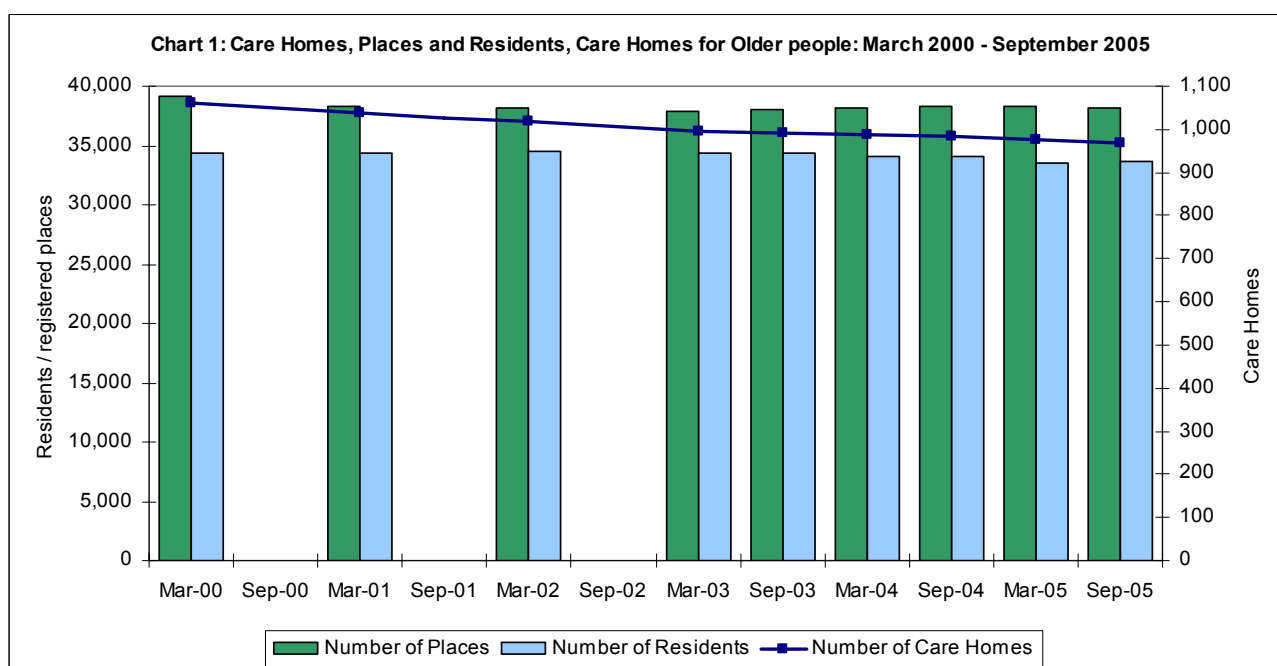

The purpose of this Statistics Release is to present national figures for care homes for adults in Scotland. All figures relate to 30 September 2005 and are provisional and, as such, subject to change. The final figures will be published on the Scottish Executive website later this year. Final figures for the period March 2000 to March 2005 are also included. The information is derived from the Scottish Care Home Census.

This release also includes details of long stay residents in Care Homes for Older People for censuses dating back to March 2003. This is the first time such information has been published since the introduction of the current form of the census in March 2003.

All figures in this release omit care homes that deregistered to become Housing Support services. Information on the number of former care homes deregistering for this reason can be found in annex F.

Main Points

- At 30 September 2005 there were a total of 1,504 registered care homes providing 43,583 places to 38,433 residents. Annexes A and G provide further details.
- The number of registered places in care homes for older people was 38,191. This had decreased by 0.3 per cent since March 2005 and by 2.4 per cent from the March 2000 level.
- 71 per cent of available places in care homes for older people were in rooms with en-suite facilities and 87 per cent of available places were in single rooms.
- Of the 32,893 long stay residents in care homes for Older People, 9000 (27 per cent) were male and 23,893 (73 per cent) were female, 48 per cent were aged 85 or over and 36 per cent were aged 75-84.

Section One: Care Homes for Older People

Table 1 – Care Homes by Sector, Places and Residents, September 2005

	LA/NHS	Private	Voluntary	Total
Number of Care Homes	186	638	145	969
Number of Places	5,741	28,034	4,416	38,191
Number of Residents	4,960	24,824	3,932	33,716
Places per Home	31	44	30	39
Occupied Places	4,979	24,829	3,931	33,739
Vacant Places	574	2,762	385	3,721
Unavailable Places	188	443	101	732
Occupancy Rate	90.0	90.1	91.3	90.3

Source: SCHC1 September 2005

In September 2005 there were 969 care homes for older people. Of these 186 were run by a Local Authority or by the NHS, 638 were privately owned and the remaining 145 were in the voluntary sector. In total, there were 91 fewer homes for older people in September 2005 than in March 2000 (when there were 1,060 such homes) and 8 fewer than in March 2005.

The 38,191 registered places in September 2005 represents 46.2 places per 1,000 population and consists of 5,741 places (15 per cent) in the Local Authority/NHS sector, 28,034 places (73 per cent) in the private sector and 4,416 places (12 per cent) in the voluntary sector. Between March 2000 and September 2005 the total number of registered places had fallen by 936 (2.4 per

cent). In the Local Authority/NHS sector there had been a decrease of 779 places (11.9 per cent) whilst in the private sector there had been a small increase with an additional 141 places (an increase of less than 1 per cent). Finally, in the voluntary sector there had been a decrease of 298 places (a reduction of 6.3 per cent).

During the same period, the number of residents had fallen by 686 (2 per cent) from 34,402 to 33,716.

Of the 38,191 registered places, 33,739 were occupied on census night with an additional 732 places unavailable. Unavailable places are places that are temporarily or permanently out of use, perhaps due to refurbishment or building work. The remaining 3,721

registered places were vacant on the night of the census. The occupancy rate (occupied and unavailable places as a percentage of all places) was therefore 90.3 per cent.

Table 3 - Registered Places in Care Homes for Older People, Local Authorities with the Largest Increases/Decreases

LOCAL AUTHORITY	NUMBER OF REGISTERED PLACES		
	Mar-00	Sep-05	% change between Mar-00 and Sep-05
Orkney Islands	99	129	30.3
North Lanarkshire	1,710	2,100	22.8
Clackmannanshire	203	234	15.3
South Lanarkshire	2,506	2,850	13.7
SCOTLAND	39,127	38,191	-2.4
South Ayrshire	1,049	912	-13.1
Edinburgh, City of	3,424	2,954	-13.7
Dundee City	1,114	957	-14.1
Aberdeen City	1,896	1,580	-16.7

Source: SCHC1 September 2005

Table 3 shows the local authorities with the largest percentage increases and decreases in the number of registered places in care homes for older people between March 2000 and September 2005. Annex B contains details of registered places for each census between these dates for all local authorities.

The biggest percentage increase in registered places since March 2000 occurred in the Orkney Islands where the number of registered places has risen from 99 in March 2000 to 129 in September 2005 (a 30.3 per cent increase associated with a net increase of two care homes). Other local authorities to have experienced large increases in the percentage of registered places were North Lanarkshire, where an additional 390 places had been added since March 2000 (an increase of 22.8 per cent), Clackmannanshire, where there had been a 15.3 per cent increase and South Lanarkshire where the figure was 13.7 per cent.

The biggest percentage decrease in the number of registered places since March 2000 occurred in Aberdeen City. Here there had been a 16.7 per cent decrease, a reduction of 316 places. This corresponded to a net decrease of 6 homes over the same period. Other local authorities to have experienced a large decrease were Dundee City (a 14.1 per cent reduction in the number of places and a net decrease of 7 care homes), the City of

Edinburgh (a 13.7 per cent reduction in places and a net decrease of 15 homes) and South Ayrshire (a 13.1 per cent fall in places and 6 fewer homes).

Overall, across Scotland there had been a 2.4 per cent reduction in the number of registered places in care homes for older people. This corresponds to a decrease of 936 places.

Registered places and Occupancy Rates in Care Homes for Older People by Local Authority: March 2003 – September 2005

Table 4 shows the number of occupied, vacant and unavailable places in care homes and the number of places registered per 1,000 population aged 65 and over by local authority. It also provides the occupancy rates for March 2003 – September 2005 by local authority. The occupancy rate is based on occupied and unavailable places as a share of total registered places. Information on unavailable places was first collected in March 2003.

An occupied place is one which currently has a resident or is committed to a resident who is temporarily absent (for example in Hospital).

Places may be unavailable for a number of reasons including redecoration, reduced staffing and building works.

Across Scotland there were 46.2 registered places in care homes for older people for every 1,000 of the population aged 65 and over. This ranged from 29.5 in East Dunbartonshire to 59.3 in South Lanarkshire.

South Lanarkshire also had the fourth lowest occupancy rate of all local authorities in Scotland. The occupancy rate in South Lanarkshire in September 2005 was 85.9 per cent. The lowest occupancy rate is in North Lanarkshire where the occupancy rate on 30 September 2005 was 81.1 per cent.

Across Scotland as a whole the occupancy rate was 90.3 per cent, up from 89.8 per cent in March 2005 and down from 92.6 per cent in March 2003. The highest occupancy rate was in Inverclyde where 96.6 per cent of places were either occupied or unavailable.

**Table 4 – Occupied, Vacant and Unavailable Registered Places by Local Authority

Care Homes for Older People: Facilities

Table 5: Facilities in Care Homes – September 2005

Occupied/Vacant Care Home Places	Without Ensuite	With Ensuite	Total Places
In Single Bedrooms	8,507	24,008	32,515
In Double Bedrooms	2,262	2,350	4,612
In Rooms with 3 or more places	187	146	333
Total	10,956	26,504	37,460

Source: SCHC1 September 2005

On census night a total of 37,460 places were either occupied or vacant across all care homes in Scotland. Of these 32,515 (87 per cent) were in single bedrooms, 4,612 (12 per cent) were in double bedrooms and 333 (around 1 per cent) were in bedrooms with 3 or more places. Since March 2003 there has been a small increase in the proportion of places in single bedrooms (up from 83 per

cent) and a corresponding reduction in the percentage in double bedrooms (down from 16 per cent). Annex C provides the percentage of available places in single rooms for the Local Authority/NHS sector and the private/voluntary sector for each local authority.

In the Local Authority/NHS sector 5,354 of the 5,553 available places (96 per cent) were in single rooms. In 16 of the local authorities 100 per cent of the available places were in single rooms and in all but 2 of the local authorities more than 90 per cent of places were in single rooms.

In the private/voluntary sector 85 per cent of the available places were in single rooms. This included all available places (100 per cent) in Shetland Isles. More than three quarters (75 per cent) of all places were located in single rooms in all but 3 of the 32 local authority areas.

Table 6: Ensuite Facilities in Care Homes March 2003 – September 2005

Available Care Home Places	Mar-03	Sep-03	Mar-04	Sep-04	Mar-05	Sep-05
With Ensuite Facilities	22,725	23,241	23,993	25,085	25,177	26,504
Without Ensuite Facilities	14,481	13,967	13,460	12,545	12,343	10,956
% Ensuite	61	62	64	67	67	71

Source: SCHC1 September 2005

As table 6 shows, en-suite facilities were available in 71 per cent of all available places (26,504 places). The proportion of available registered care home places with en-suite facilities has risen from 67 per cent on 31 March 2005, the number of places offering en-suite facilities having increased by 1,327 and the number of places without en-suite facilities having reduced by 1,387. Ensuite facilities were available in 74 per cent of places in single bedrooms.

Annex D shows the number and percentage of rooms with en-suite facilities split between the Local Authority/NHS sector and Private/Voluntary homes. This shows that, across Scotland, in the Local Authority/NHS sector 2,692 of the 5,553 available places (48 per cent) had en-suite facilities whilst 75 per cent of all private/voluntary homes had en-suite facilities.

There is also significant variation in the proportion of rooms with en-suite facilities between local authorities. In the Local Authority/NHS sector all of the available places in Clackmannanshire, East Renfrewshire, Shetland Isles and South Lanarkshire had en-suite facilities. By comparison none of the available places in this sector in East Ayrshire, Midlothian, Renfrewshire or South Ayrshire offered en-suite facilities.

In the Private/Voluntary sector all of the available places in Clackmannanshire and the Shetland Islands had en-suite facilities whilst none of the 16 available places in Orkney Islands were en-suite. In 17 of the 32 local authorities 75 per cent or more of places in this sector had en-suite facilities.

Overall, since March 2003, the proportion of places with en-suite facilities has risen from 61 per cent.

Care Homes for Older People: Closures and New Homes

Table 7: Care Home Closures by Sector

Census Period	Number of home closures			Total
	LA	Private	Voluntary	
Mar 2000 - Mar 2001	10	25	4	39
Mar 2001 - Mar 2002	5	21	3	29
Mar 2002 - Mar 2003	2	22	6	30
Mar 2003 - Sep 2003	1	6	3	10
Sep 2003 - Mar 2004	5	5	3	13
Mar 2004 - Sep 2004	5	13	0	18
Sep 2004 - Mar 2005	2	6	2	10
Mar 2005 - Sep 2005	5	9	2	16
Total	35	107	23	165

Source: SCHC1 September 2005

Table 7 shows that 16 care homes closed between March 2005 and September 2005. The homes that closed had an average of 32.7 places compared to the average size of all open care homes on 30 September 2005 of 39.4 places. Of the 165 homes which have closed since March 2000, 107 homes (65 per cent of closed homes) operated in the private sector. Thirty-five closed homes (21 per cent of closures) were local authority run homes. The remaining 23 closures (14 per cent) operated in the voluntary sector. Annex E provides a local authority split of care home closures between March 2000 and September 2005.

Care Homes for Older People: Newly Opened Care Homes

Table 8: New Care Homes by Sector

Census Period	New Care Homes			Total
	LA	Private	Voluntary	
Mar 2000 - Mar 2001	2	11	3	16
Mar 2001 - Mar 2002	3	6	1	10
Mar 2002 - Mar 2003	1	4	2	7
Mar 2003 - Sep 2003	3	2	3	8
Sep 2003 - Mar 2004	4	4	0	8
Mar 2004 - Sep 2004	2	8	2	12
Sep 2004 - Mar 2005	0	5	0	5
Mar 2005 - Sep 2005	2	5	1	8
Total	17	45	12	74

Source: SCHC1 September 2005

Since March 2000, 74 care homes have opened in Scotland. Over 60 per cent of these (45 homes) opened in the private sector whilst 17 homes opened in the local authority sector (23 per cent) and the remaining 12 (16 per cent) were in the voluntary sector. In the 6 months prior to the most recent census night

in September 2005, 8 homes opened and had an average of 45.1 places (again compared to the average size of all open care homes on 30 September 2005 of 39.4 places). Annex E provides details of new care homes which opened between March 2000 and September 2005. The information is split by local authority.

Care Home Average Gross Weekly Charge

Table 9 shows the average gross weekly charge per long stay resident in care homes for older people. The table is broken down into local authority run homes and independent run homes (private and voluntary). It gives charging information by local authority for March 2003, March 2004 and March 2005.

The average gross weekly charge per home is equal to the amount the home charges in total to all residents each week divided by the number of residents. This is before any deductions are made (such as income from local authorities for accommodation or free personal care).

The figures in the table have been weighted to reflect the capacity of care homes within each local authority. Where the average gross weekly charge is based on less than 5 homes in the independent sector no figure has been given to protect care home confidentiality.

For Scotland overall the average gross weekly charge for all care homes in March 2005 was £446. This was an increase of 5.2 per cent from the March 2004 level of £424 and of 12.3 per cent from the March 2003 level of £397. During the two year period there was a 14.5 per cent increase in the average charge of local authority run homes (£433 to £496) and a 12.3 per cent increase in the charge of private/voluntary homes (£390 to £438).

There is a large amount of variation between local authorities both on their overall average gross weekly charge and the change in charging between March 2003 and March 2005. Part of the reason for this variation will be that some homes will offer nursing care to residents while others (former residential care

homes) will not. Similarly charges may vary if a room has one place registered in it as opposed to two or whether or not the room offers ensuite facilities. The gross weekly charge as it is presented does not distinguish between these factors. It represents charging information for all care homes for older people registered with the Care Commission.

The largest increase between March 2003 and March 2005 in the average gross weekly charge occurred in East Lothian (an increase of 23.8 per cent from £404 to £500). East Renfrewshire, Edinburgh, Eilean Siar, Highland and Midlothian also showed an increase of over 15 per cent during the 2 years.

The lowest increase occurred in East Ayrshire which had an increase in the gross weekly charge of 5.3 per cent between March 2003 and March 2005.

Over the one year period between March 2004 and March 2005 the largest increase occurred in Eilean Siar (an £80 increase from £508 to £588) and the lowest increase was in East Renfrewshire (an £8 rise from £442 to £450).

At March 2005 the average gross weekly charge in local authority run care homes ranged from £276 in South Lanarkshire to £735 in Edinburgh. Across Scotland the average charge in this sector was £496. For independent sector run care homes the charge varied from £390 in Dumfries & Galloway to £534 in Edinburgh and was £438 across Scotland as a whole.

Admissions and Discharges.

In care homes run by local authorities or by the NHS there were a total of 5,745 admissions. These accounted for 34 per cent of all admissions (13 per cent of all long stay and 49 per cent of all short stay admissions). In the Local Authority/NHS sector, the majority of admissions (84 per cent) were for a short stay or respite care.

In the private sector there were a total of 9,173 admissions, 5,307 (58 per cent) of which were long stay and 3,866 (42 per cent) short stay or respite. In total these represented 55 per cent of all admissions and included 77 per cent of all long stay and 39 per cent of all short stay admissions.

Admissions in the voluntary sector accounted for the remaining 11 per cent of all admissions including 9 per cent of all long

stay and 12 per cent of all short stay admissions.

Between 31 March 2005 and 30 September 2005, 12,036 residents were discharged from care homes. Two thousand, two hundred and twenty four of these discharges were long stay residents and 9,812 were short stay residents. Discharges from local authority run homes accounted for 44 per cent of all discharges whilst a further 44 per cent of discharges were of residents in the private sector and 12 per cent were in the voluntary sector.

During the 6 months preceding the most recent census 4,601 care home residents died.

Of these the majority, 4,518 (98 per cent) were long stay residents and 3,621 of these were in the private sector.

Of the 32,893 long stay residents in care homes for older people on 30 September 2005, 23,893 (almost three-quarters) were female and 9,000 were male. More than half of the female long stay residents were aged 85 or over and a further 35 per cent were aged between 75 and 84. Amongst male residents, 36 per cent were aged 85 and over and 38 per

cent were aged 75-84. Since March 2003 the percentage of long stay residents aged 85 and over has fallen slightly amongst both male and female residents. There has been a corresponding increase in the percentage of residents aged 75-84 and amongst those aged under 65.

Table 12: Location Resident Admitted From by Age, April 2002 – September 2005

Admitted from	Apr 02 - Mar 03	Apr 03 - Sep 03	Oct 03 - Mar 04	Apr 04 - Sep 04	Oct 04 - Mar 05	Apr 05 - Sep 05

Source: SCHC2A September 2005

Table 12 gives a breakdown of where long stay residents were before being admitted to a care home. This is provided for all residents admitted in each census period between April 2002 and September 2005.

Between April 2005 and September 2005 6,870 long stay residents were admitted to care homes and for all but 72 of these admission data was known or estimated. Of these 6,798, 47 per cent were admitted from a hospital. A further 35 per cent were admitted from their own home, 16 per cent from another care home, 1 per cent from sheltered housing and 1 per cent from supported accommodation. This distribution has remained fairly steady since the March 2003 census.

Table 13: Destination on Discharge, April 2002 – September 2005

Destination on discharge	Apr 02 - Mar 03	Apr 03 - Sep 03	Oct 03 - Mar 04	Apr 04 - Sep 04	Oct 04 - Mar 05	Apr 05 - Sep 05

Source: SCHC2A September 2005

Table 13 shows the destination of long stay residents who were discharged from care homes in each census period back to April 2002 – March 2003. Between April 2005 and September 2005, 67 per cent of discharges were due to deaths, the figure generally being larger in the March censuses which cover the winter period and dropping in the September censuses. A further 15 per cent exited to another care home, 12 per cent went into

hospital and 4 per cent went to their own home.

Table 14: Incomplete Length of Stay, March 2003 – September 2005

Source: SCHC2A September 2005

Table 14 provides details of the incomplete length of stay of residents in care homes on census nights. On 30 September 2005, 37 per cent of long stay residents in care homes for older people had been there for between 1 and 3 years. Three per cent of residents had spent less than a month in the care home whilst 17 per cent had been in the care home for 5 years or more. There has been little variation in this distribution since March 2003.

Residents who were discharged between April 2005 and September 2005 had spent an average of 2.6 years in a care home.

Table 15: Resident Characteristics, September 2005

Resident Characteristic	Under 65	65-74	75-84	85+	All ages
Requiring Nursing Care	982	2,109	6,656	8,251	17,998

Source: SCHC2A September 2005

Table 15 shows the number of long stay residents with various characteristics. Residents may have more than one of these characteristics. More than half of all residents in each age group in care homes for older people required nursing care (17,998 of the 32,893). A total of 14,291 long stay residents (43 per cent) had dementia (of these, 68% had their dementia medically diagnosed).

On 30 September 2005 there were 46 care homes for physically disabled people providing 551 places and with 477 residents. Amongst the 547 available places 482 (88 per cent) were in single rooms and 351 (64 per cent) offered en-suite facilities.

Since March 2000 the number of care homes has increased by 7 from 39. In the same period, the number of registered places has fallen from 823, a reduction of 272 places, and the number of residents has dropped from 723, down by 246. Of the 46 care homes for

physically disabled people, the majority, 35 (or 76 per cent) were operated by voluntary organisations. These voluntary homes offered 432 places to residents (78 per cent of all places). Of the remaining 11 care homes, 3 were operated by local authorities and 8 were in the private sector.

Table 17 omits any homes that later deregistered (after March 2002) to become Housing Support services (more information on those can be found in annex F).

Source: SCHC1 September 2005

On the most recent census night there were 103 care homes in Scotland for adults with mental health problems. Of these 78 per cent (80 homes) were run by voluntary organisations. The 103 care homes offered a total of 1,249 places, 1,115 of which were occupied by residents whilst 107 were vacant and the remaining 27 were unavailable.

Of the 1,249 registered places, 1,120 (90 per cent) were in single rooms and 622 (50 per cent) were in rooms with ensuite facilities.

The 80 care homes in the voluntary sector offered a total of 790 places and had an average of 10 places each. This compares to an average size of 20 places amongst the 17 privately owned care homes which offered a total of 338 places and housed 309 residents.

The 6 local authority run care homes offered a total of 121 places and had an average of 20 places.

Since March 2000, the number of care homes offering services in this client group has dropped by 26, from 129. However, in the same period the number of places has increased by 15 and there has been an increase in the number of residents, from 1,088 to 1,117. The average size of a care home in March 2000 was 10 places.

Table 15 omits any homes that have deregistered to become housing support services (more information on those can be found in annex F).

Source: SCHC1 September 2005

On 30 September 2005 there were 331 care homes for adults with learning disabilities. These homes offered a total of 2,839 places and had 2,521 residents. Around 89 per cent of available places (2,470) were in single rooms and 22 per cent were in rooms with ensuite facilities.

Just over 65 per cent (216) of the care homes in this client group and 51 per cent (1,459) of the registered places were in the voluntary sector whilst of the remaining care homes 68 (21 per cent) were in the private sector and 47 (14 per cent) were run by local authorities. The average size of these care homes varied between sectors. Homes were, on average, 7 places in size the voluntary sector, 10 places in local authority homes and 14 places in privately operated care homes.

Since March 2000, the number of care homes has fallen by 54 from 385 in 2000 to the current level of 331 homes. There has been a

corresponding drop in the number of places from 3,657 to 2,839. This is a reduction of 818 places (22 per cent). The number of residents in care homes for adults with learning disabilities has fallen by 815 from 3,336 in March 2000 to 2,521 in September 2005. Table 21 excludes information on homes deregistering to housing support which can be found in annex F.

Further information on adults with learning disabilities and those who live in their own tenancies is available from:

<http://www.scotland.gov.uk/Publications/2005/05/23160344/03460>

Care homes registered for other types of user can include homes for adults with acquired brain injuries, mothers and children, alcohol related problems, drugs related problems, AIDS/HIV and other vulnerable groups.

In September 2005 there were a total of 55 care homes for adults in other client groups. These homes offered a total of 753 places, an average of 14 places per home, and had 602 residents. The majority of the 55 homes (47 homes or 85 per cent of all homes) operated in the voluntary sector and these homes offered a total of 602 places, making the average size of a care home in the voluntary sector 13 places. Of the remaining 8 care homes, 5 were run by local authorities and 3 were privately run. The local authority run homes offered a total of 50 places (10 places

per home) whilst the 3 private homes offered 101 places, an average of 34 places per home.

A total of 560 of the available places in homes in this client group were in single rooms (77 per cent) and 140 places (19 per cent) were in rooms with ensuite facilities.

Since March 2000 the number of care homes in this client group has fallen by 16, from 71 to 55. This has coincided with a reduction of 229 places, from 982 to 753 and of 181 residents from 783 to 602. Table 19 omits information on care homes for other client groups that have deregistered to become housing support services (see annex F).

Background Information on the Census of Care Home Establishments

The Scottish Care Home census is intended to cover all adult care home establishments that are registered with the Care Commission. The Care Commission is responsible for regulating a wide range of social services and was established under the Regulation of Care (Scotland) Act 2001.

This census (first issued in March 2003) replaces two previous surveys. It combines the former 'Residential Care Home Census – R1' (run by the Scottish Executive) and the 'Private Nursing Homes Census' (run by ISD Scotland).

The figures from this census cannot be directly compared with the figures from the Residential Care Home and Private Nursing Home censuses as many homes were registered as both residential care homes and private nursing homes. Therefore simply adding together the final statistics published in those 2 surveys would result in double counting.

The 2000 to 2002 figures presented in this statistics release remove this element of double counting by combining the information from the residential care home census and nursing home census and comparing this with the information received in March 2003. All figures in the release are final apart from September 2005 which is provisional.

This census is issued twice a year (whereas the previous surveys were annual). The figures in this release relate to 30 September 2005. They are provisional and subject to change.

The number of open establishments covered by the September census was 1,504. Full or partial responses were received from 1,339 open care homes giving an estimated response rate of approximately 89 per cent.

The figures in this statistics release have been grossed up to take account of non-response. The

methodology adopted was based on carrying forward previous records available for the care home in question. This methodology is different to that used previously for non-response, therefore care should be taken when making comparisons with the pre-2003 data.

All figures in this release omit care homes that deregistered to become Housing Support services. Information on the number of former care homes deregistering for this reason can be found in annex F.

This release contains details of long stay residents in care homes for older people. This is the first time such information has been published since the introduction of the current form of the census in March 2003. Forms are received for approximately 75 per cent of all long stay residents. The remaining 25 per cent are estimated using a series of computer programs. If resident details are missing from a particular home, the programs will identify 'similar' homes for which resident details are available and will estimate the details of the missing records based on these.

Further Information

Further details and analysis of both the establishment and resident data presented in this Statistics Release is available on request from the following address. The Statistics Release is also available on the Scottish Executive web site (www.scotland.gov.uk). This release was published on 15 March 2006

Notes:

1. Registered Places – The number of places registered in care homes for older people. Figures are given by local authority for March 2000, March 2001, March 2002, March 2003, September 2003, March 2004, September 2004, March 2005 and September 2005.
2. % Change 2000 – 2005 – The percentage change in the number of registered places in care homes for older people between March 2000 and September 2005. The change is given by individual local authority and for Scotland overall.
3. % Change during 6 months to September 2005 – The percentage change in the number of registered places in care homes for older people between March 2005 and September 2005. The change is given by local authority and for Scotland overall.

Notes:

1. Number of Registered Care Homes by Local Authority – The number of care homes registered with the Care Commission within each local authority. Figures are given for March 2000 and 2003 and for September 2003, 2004 and 2005.
2. New – Care Homes that have newly registered with the Care Commission since the previous March census.
3. Home Closures – Care Homes that have closed and therefore cancelled their registration with the Care Commission since the previous March census.

Annex F

Care Homes that have Opened, Closed or Deregistered March 2000 – September 2005

The table below shows the number of homes that have opened, closed or deregistered to become housing support services between March 2000 and September 2005. This is the only table in this publication that contains historical data which includes homes that deregistered to housing support.

CLIENT GROUP	Registered in March 2000	Closed between March 2000 and September 2005	De-egistered to Housing Support since March 2002	Opened between March 2000 and September 2005	Resgistered in September 2005
Older People	1,073	165	16	77	969
Physical Disabilities	50	10	16	22	46
mental health Problems	199	44	94	42	103
Learning Disabilities	639	113	288	93	331
Other Client groups	117	24	53	15	55
TOTAL	2,078	359	467	246	1,501

Source: SCHC1 September 2005

Notes:

1. 'Registered in March 2000' – The number of care homes by client group that were open on 31 March 2000. 2,078 care homes were open on this date.
2. 'Closed in-between March 2000 and September 2005' – The number of care homes by client group that have closed in-between March 2000 and September 2005. 359 care homes have closed in total during this period.
3. 'De-registered to Housing Support since March 2002' – The number of care homes that deregistered with the Care Commission to become a Housing Support service. This is broken down by client group since March 2002. These homes are therefore omitted from the Scottish Care Home Census as they are no longer registered as a service providing care. 467 homes have deregistered since March 2002.
 16 were primarily for older people/dementia
 16 were primarily for physical disabilities
 94 were primarily for adults with mental health problems
 288 were primarily for adults with learning disabilities
 53 were primarily for other client groups
4. 'Opened in-between March 2000 and September 2005' – The number of care homes by client group that have opened in-between March 2000 and September 2005. This figure will include any homes that opened, registered as a care service but then deregistered to become a Housing Support service. 246 care homes have opened in total during these 3 years.
5. 'Registered in September 2005' – The number of care homes by client group that were open and registered with the Care Commission as a service providing care on 30 September 2005. 1,501 homes were open on this date.

Annex G

Care Homes by Client Group: March 2000 - September 2005

(Excludes homes which de-registered between April 2002 and September 2005)
