

# ScotMER Symposium

## 3-4<sup>th</sup> March 2020

**Gayle Holland**  
**Marine Scotland Licensing Operations Team**

**marine scotland**

# What has worked well

- Environmental impacts largely reduced
- Post consent engagement
- RAG groups
- Collaboration
- Valuable information from monitoring
- Site visits

# What are the main challenges

- Reporting on monitoring
- Information availability to inform decisions
- Proportionality
- No significant effects but still uncertainty
- Transferability of information between regions
- Data management
- DPOs further offshore

# What are the priorities

- Ministerial interest in monitoring
- Making monitoring information more available
  - Clearer on reporting requirements
  - Quality of the data
- Refining processes to ensure that monitoring results are incorporated into decision making
- Continuing the RAGs to ensure that monitoring is being delivered

# Slido Question

- What could MS-LOT introduce to improve information exchange on monitoring results?
